

Dacke Industri

Dacke Industri shall continuously develop our employees and companies to be a profitable, sustainable and professional industry group.

Our focus is to develop our companies, and we also are constantly looking for new investments in innovative technology companies that share our values. Dacke Industri has a decentralized model where our companies have a high degree of independence and are run independently. We provide expert knowledge and strategic guidance to build long-term sustainable companies.

Business concept

Dacke Industri's business concept is to invest in, support, and develop leading companies with in-depth technology knowledge. Preferably with the focus on own products, customer-specific components, and high-performance systems, as well as value-adding application knowledge.
